

BEAR-LOC[®]

FIELD GUIDE

MILITARY ENGINEERS

How It Works. Why It Matters. What to Know Before You Spec It

York Precision
MACHINING & HYDRAULICS

The Bear-Loc® team is partnering with you to make your reconnaissance mission as easy as possible.

We know you're searching for a reliable solution that's simple and safe, and you need streamlined intel you can pass up the chain.

This short field guide will ensure you...

- Thoroughly understand the Bear-Loc™ design along with key benefits and application options.
- Discover YPMH's qualities that make us a trusted partner.
- Meet the other contractors who use Bear-Loc™ in their critical applications.
- Avoid wasted time and frustration when taking your next steps.

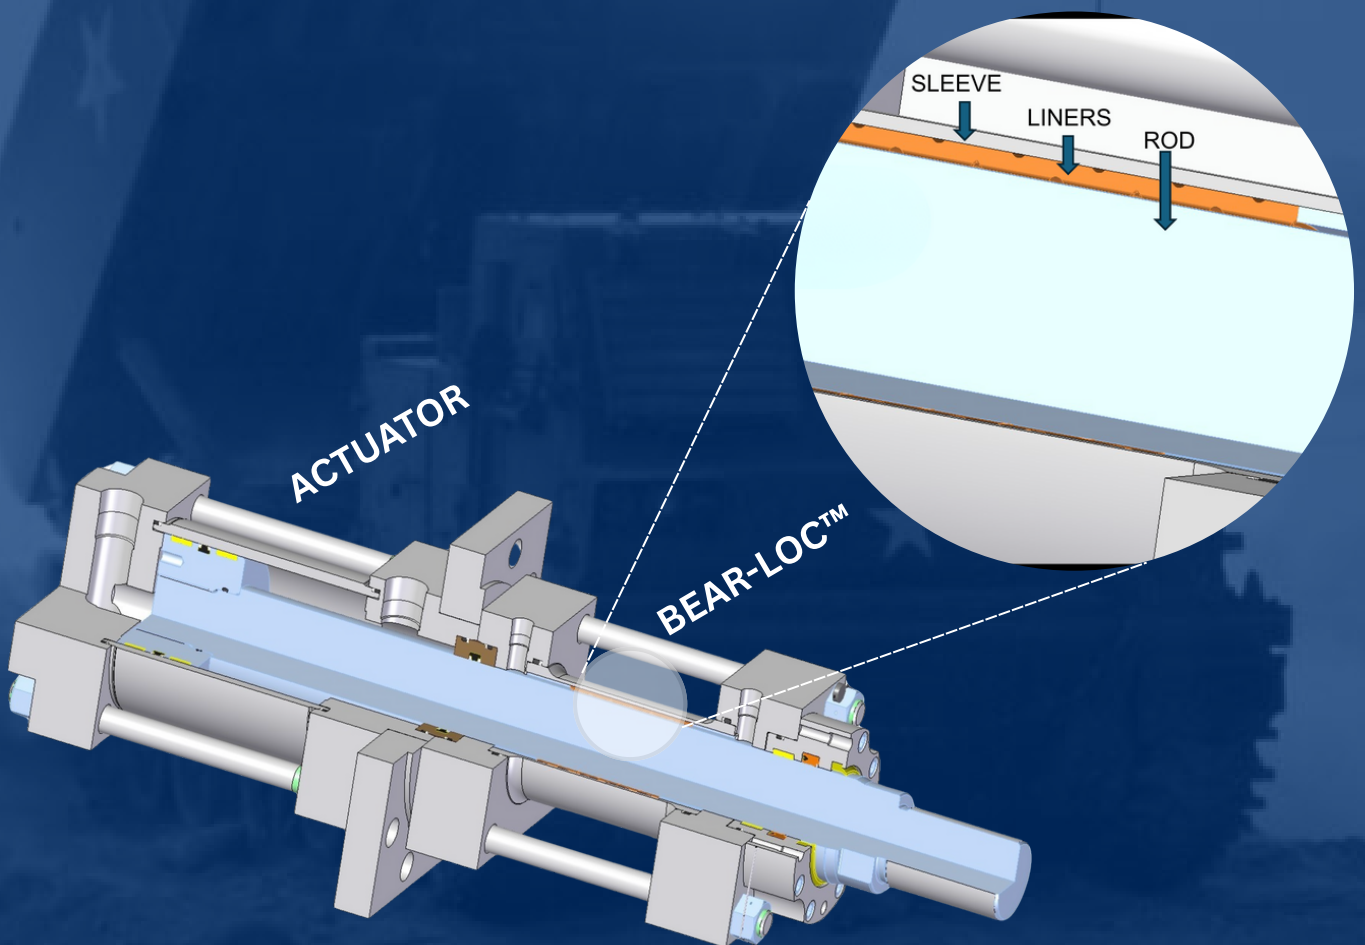

BENEFITS

The background of the slide is a dark blue-tinted photograph of a military tank. The tank is positioned diagonally, with its turret and main gun barrel visible. A white star insignia is visible on the side of the turret. The overall image has a grainy, high-contrast appearance typical of military photography.

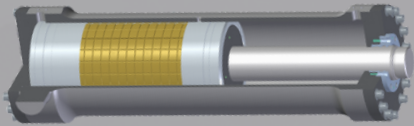

- Less downtime in the field
- Fail-safe reliability
- Infinite position locking
- Zero backlash
- High system stiffness
- Easy to use

FEATURES

- High-quality precision components
- Best-in-class simplistic design
- Unique patented innovation
